

Reference Letter

To Whom It May Concern,

October 27,2025

I am pleased to provide this letter of recommendation on behalf of Junyi Zou in support of his application to your esteemed university. During the study program about *Big Data Computing and Database Use under Machine Learning*, he was under my supervision, and his academic performance and personality impressed me thoroughly.

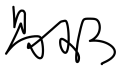

Junyi is a motivated and technically capable student with good analytical skills. He demonstrated a serious and self-driven attitude toward his studies. He actively participated in course discussions, thoughtfully analyzed technical tasks, and regularly sought feedback to deepen his understanding. His strong interest in machine learning and big data technologies was reflected in both his classroom contributions and his independent work.

Junyi's topic is "*Optimization of Network Fraud Information Processing Using Spark Based CNN and Word2Vec Algorithms*". The sharp increase in online fraud information makes effective handling crucial. He sorts out relevant technical methods, collects data on online fraud information, builds a processing system using Spark, CNN, and Word2Vec algorithms, and adjusts parameter optimization. He compares the effects of different schemes, summarizes their advantages and disadvantages, improves the accuracy and efficiency of fraud information processing, and provides better support for combating online fraud and protecting public safety.

I am confident that Junyi Zou possesses the programming proficiency, methodological discipline, and research potential to thrive in your program. His capacity to handle large-scale data challenges and develop applied technical solutions makes him a promising candidate for advanced study. I give him my full endorsement. If you have any questions, please feel free to contact me.

Yours faithfully,

Ke Yi

Professor

Department of Computer Science and Engineering
The Hong Kong University of Science and Technology
Clear Water Bay, Kowloon, Hong Kong
